Correction: Accessing hepatitis C direct acting antivirals among people living with hepatitis C: a qualitative study

Tony Antoniou^{1,2,3*}, Cheryl Pritlove^{1,4}, Dana Shearer¹, Mina Tadrous^{5,6}, Hemant Shah^{7,8} and Tara Gomes^{1,5,9}

International Journal for Equity in Health (2023) 22:112
<https://doi.org/10.1186/s12939-023-01924-4>

After publication of this article [1], the authors reported that in the Sampling and Recruitment section, the phrase ‘We partnered with an outpatient specialist-led liver clinic affiliated with a large teaching hospital and three clinics of the downtown Toronto Community Hepatitis C Program to assist us in recruiting a diverse sample of participants according to sex, age and current or past history of injection drug use. The Toronto Community Hepatitis C Program provides low-threshold access to DAAs and additional support for people who use drugs or alcohol [39]’ should have read ‘We partnered with an outpatient specialist-led liver clinic affiliated with a large teaching hospital and three primary-care based hepatitis C clinics

to assist us in recruiting a diverse sample of participants according to sex, age and current or past history of injection drug use.’

As part of this change, reference 39 has been removed. The original article [1] has been corrected.

Published online: 11 October 2023
